# VIJAY KUMAR NAROJU

Enterprise Network Engineer | CCNP Enterprise | AWS Advanced Networking | Palo Alto | Azure | Hybrid Cloud
Texas, USA | +1 (832) 646-5402 | vijaykumarnaroju554@gmail.com | LinkedIn

## SUMMARY

Network Engineer with 5+ years designing, implementing, and supporting enterprise LAN/WAN, network security, and hybrid cloud infrastructure. CCNP Enterprise Certified | AWS Certified Advanced Networking – Specialty. Hands-on with Cisco routing/switching (OSPF, BGP, EIGRP), Palo Alto firewalls, AWS and Azure networking, IPSec VPNs, and Python-based network automation. Track record of reducing MTTR, hardening enterprise security posture, and supporting production environments for 1,400+ users under ITIL change management.

## WORK EXPERIENCE

**Network Engineer | Microsoft** | Los Angeles, CA | Jun 2025 – Present

- Designed, deployed, and optimized enterprise LAN/WAN infrastructure using IPv4/IPv6, OSPF, VLANs, routing, and switching technologies to improve scalability, resiliency, and operational efficiency.
- Optimized Layer 2/3 traffic flows through STP tuning, EtherChannel configuration, and subnet reorganization, reducing internal latency and packet retransmissions.
- Designed and supported secure hybrid connectivity using Azure networking, IPSec VPNs, SD-WAN, and enterprise routing technologies while maintaining high availability across distributed environments.
- Implemented secure hybrid cloud connectivity using AWS VPC, route tables, security groups, and IPSec VPNs, enabling reliable and compliant access for 1,400+ corporate users.
- Administered Palo Alto Networks firewalls (PAN-OS) and Panorama — security policies, NAT rules, App-ID, User-ID, GlobalProtect VPN, and Threat Prevention profiles.
- Reduced MTTR by ~30% through proactive troubleshooting using ping, traceroute, SNMP monitoring, and Wireshark packet analysis.
- Partnered with infrastructure, security, and operations teams to deploy production network changes and enforce configuration standards under ITIL change management.

**Network Engineer | HCL Technologies** | India | Dec 2022 – Dec 2023

- Designed, implemented, and supported enterprise routing and switching infrastructure using BGP, OSPF, EIGRP, VLANs, and Inter-VLAN routing across production environments.
- Secured network perimeters by administering firewalls, standard/extended ACLs, NAT, and DMZ configurations, reducing unauthorized access attempts.
- Deployed site-to-site and remote IPSec VPNs to improve connectivity for distributed users.
- Engineered and optimized Palo Alto firewall environments — security policies, NAT rules, IPSec VPNs, URL filtering, and threat prevention profiles.
- Supported incident, change, and problem management, collaborating with engineering teams to implement production network changes while minimizing service disruption.

**Network Support Engineer | Veritas** | India | May 2021 – Nov 2022

- Administered and optimized enterprise LAN/WAN infrastructure, troubleshooting Layer 2/3 connectivity and supporting secure network operations for 900+ users.
- Resolved Layer 2/3 connectivity issues across switches, routers, and wireless access points, achieving strong first-level resolution rates.
- Maintained CLI-based configurations on routers, switches, and firewalls to reduce configuration-related issues.
- Processed incident and change requests in ITIL-aligned ticketing tools while consistently meeting SLA expectations.

## CERTIFICATIONS

- Cisco Certified Network Professional (CCNP) Enterprise – Cisco
- AWS Certified Advanced Networking – Specialty (ANS-C01) – Amazon Web Services
- Cisco Certified Network Associate (CCNA) – Cisco Systems
- Cisco CyberOps Associate – Cisco Networking Academy

## KEY PROJECTS

**Enterprise Hybrid Network Simulation with AWS Site-to-Site VPN**

- Built a 4-site enterprise network topology in GNS3 using Cisco routers to simulate a distributed branch network environment.
- Configured OSPF for internal routing across all sites, ensuring efficient route convergence within the simulated topology.
- Configured BGP to establish external connectivity and proper route exchange between the on-premises topology and AWS.
- Established and validated an AWS Site-to-Site IPSec VPN tunnel between the simulated on-premises network and an AWS VPC.
- Verified end-to-end traffic flow between the branch network and AWS resources, confirming stable routing and VPN tunnel performance.

**Palo Alto Firewall Security Lab**

- Deployed a Palo Alto VM-Series firewall in a virtual lab environment to replicate enterprise perimeter security operations.
- Configured security policies and NAT policies to control and secure simulated inbound and outbound traffic.
- Enabled App-ID and User-ID for application-aware and identity-based policy enforcement.
- Configured GlobalProtect and IPSec VPN tunnels, along with URL filtering, to secure remote access and web traffic.
- Diagnosed and resolved a VPN connectivity failure caused by incorrect NAT rule ordering, restoring successful IPSec tunnel establishment.

**Network Automation with Python/Netmiko and Ansible**

- Developed Python scripts using Netmiko to automate connections and standardize tasks across multiple Cisco network devices.
- Built automated configuration backup routines to capture and store device configurations for change tracking.
- Collected interface and routing information programmatically to support network state visibility.
- Used Ansible playbooks to push VLAN and interface configuration updates consistently across devices.
- Implemented configuration compliance checks across 10–15 Cisco devices in the lab environment, reducing manual verification effort.

## SKILLS

**Networking:** TCP/IP, OSI Model, IPv4/IPv6, Subnetting, CIDR, VLSM, LAN/WAN/MAN, DNS, DHCP, ARP, ICMP

**Routing & Switching:** Static Routing, OSPF, EIGRP, BGP, VLAN, Inter-VLAN Routing, 802.1Q Trunking, STP/RSTP, EtherChannel, Cisco IOS

**Cloud Networking:** AWS VPC, Transit Gateway, Direct Connect, Route Tables, NAT/Internet Gateway, Security Groups, Site-to-Site VPN, Azure VNets, NSGs, VPN Gateway, VNet Peering

**Network Security:** Firewalls, ACLs, NAT/PAT, IPSec VPN, IDS/IPS, DMZ, Palo Alto (PAN-OS, Panorama), App-ID, User-ID, GlobalProtect, Threat Prevention

**Monitoring & Troubleshooting:** Wireshark, SNMP, Ping, Traceroute, Netstat, Root Cause Analysis, Packet Capture, Performance Optimization

**Automation & Scripting:** Python, Bash, PowerShell, REST APIs, Git, JSON, YAML, Terraform, Ansible

**Systems & ITSM:** Linux (RHEL, Ubuntu), Windows Server, ServiceNow, ITIL Incident/Change/Problem Management

**Virtualization & Labs:** GNS3

## EDUCATION

**Master of Science in Management Information Systems**
Lamar University, Texas | GPA: 3.9/4.0
